CARBON, ALTA., THURSDAY, MAY 2, 1946

\$2.00 Per Year; 5c A Copy.

OUR HALF ACRE

By J. G. UMBRITE,

Field Supervisor
M. D. of Kneehill

Pulverized soil is a forerunner of erosion. Tillage implements which tend to leave the soil loose and finely pulverized should be avoided, unless they can be operated in such a way as to prevent this condition. A trash cover, a lumpy or cloddy condition of the surface soil, and the prevention of a loose pulverized surface are essential measures for control of soil erosion. The burning of stubble is a practice that should be avoided, as it eventually leads to soil drifting.

From present indications the gopher population is increasing. Now is the best time to get rid of this pest by poisoning. Poison can be secured from your local stores or from your local agent of the United Grain Growers elevator.

If you have had infestations from the wheat stem sawfly a few precautionary practices are well worth while. The order of seeding should be, 1st, sawfly trap strips; 2nd, coarse grains and lastly wheat. In badly infested areas the seeding of wheat should be delayed till the middle of May on summer-fallow. Infested stubble should not be seeded.

Grasshopper Control

Timely and careful farm practices can usually make the poisoning of grasshoppers unnecessary. Shallow cultivate all stubble after harvest or soon after spring thaw to root up the eggs. Don't stubble in grain unless land has had above treatment.

Three New Stores for Drum'

The business and industrial section of Drumheller is leaps and bounds ahead of the much needed home construction.

Two stores are to be erected on Centre St. and another on Railway Avenue within the next few weeks. The modern headquarters of Gorman's Ltd. is now completed.

Excavation is now well under way for the \$600,000 addition to the Canadian Utilities plant adjoining their present site.

This new addition will bring the local power plant up to par with larger Canadian cities. The Canadian Utilities are also extending their power line north ward from Delburne.

Some of the most modern equipment available will be installed in this new addition to the power plant.

Millie Kaughman Dick Poole, Married

A quiet wedding was solemnized at the United Manse, Carbon on Thursday evening, April 25th at 9 o'clock when Mrs. Millicent M. Kaughman, daughter of Mr. and Mrs. Harry Hunt of Carbon, became the bride of Norman (Dick) Poole, son of Mr. and Mrs. Wm. J. Poole, also of Carbon.

The marriage was conducted by the Rev R. R. Hinchey in the presence of the parents of the bridal couple.

Mr and Mrs. Poole will reside on the grooms farm at Carbon.

Continued Price Control Sought

The Dominion government is being asked to maintain price control throughout Canada by the Labor Progressive Party.

Ben Swankey, provincial organizer of the party is addressing a series of meetings in the Drumheller valley on this issue which is receiving support.

Funds are also being raised throughout the valley at the meetings for the Fred Rose defence fund committee at Montreal.

School Board, Driver, Sued

A claim for \$21,826 was filed in supreme court Saturday by Henry Stern, living near Beiseker and his eight year old daughter, against Wheatland School District No. 40 school board and Edwin Lang, bus driver.

The claim was in connection with injuries allegedly received by Marelyn Stern, passenger in the school bus, when it ran into a hole on the highway 8 miles east of Beiseker Nov. 5, 1945.

The girl was allegedly thrown from one seat against another seat. She was brought to hospital in Calgary for 26 days' treatment.

Successful flax growers plan their fields, anticipate weeds and follow tested cultural practices. The high returns per acre from a crop with an assured market merits careful planning and planting they say.

OBITUARY

Harry Dunsmore, 75, former prominent Rockyford farmer, died last Sunday at his home in Calgary.

Mr. Dunsmore was born in Towas, Mich., and moved to Rockyford 28 years ago where he farmed until retiring two years ago when he moved to Calgary.

A charter member of Rockyford Lodge No 123, A.F. and A.M., he also belonged to the Rockyford United Church. He was an active member of the wheat pool and served for many years on the school board.

Mr. Dunsmore is survived by his wife, Emma; a daughter, Mrs. Ethel Dingwall Calgary; three sons, Lowell, Winnipeg; Arthur and Frank, Rockyford; two brothers, Thomas, Newport Ore., and Charles, Portland, Ore., and six grandchildren.

Funeral services were conducted Thursday by Rev. Fred Chapman in Rockyford United Church. Interment followed in the family plot, Rockyford cemetery.

NO WONDER WE WERE NOT ABLE TO GET THEM

The minister of trade and commerce stated in the House of Commons recently that 370,191 men's shirts were exported under permit from Canada during 1945 and the first two months of 1946. In the same period 47,224 pairs of socks were exported, 52,000 pairs of men's pyjamas, 265,000 pairs of men's shoes and over a million units of children's clothing.

TUDOR

Mr. and Mrs. Cliff Larsen are guests at the home of Mr. Bill Dawson, local Pool agent.

Mrs. Jean Walker, our school teacher is back to work after spending the Easter vacation at her home in Calgary.

We extend our sympathy to the Dunsmore family in the loss of their father, Mr. Harry Dunsmore who passed away on Easter Sunday.

We are sorry to hear little Jeanette Kyten fell off her saddle pony and fractured her arm.

Mr. and Mrs. Ted James of Arrowwood spent the Easter week with Mrs. James' brother Sherman Browns, and returned to their home on Friday.

Rotarians Hold Birthday Party

The birthday party of the Drumheller Rotary Club held in the Corner Cafe banquet room to mark the 22nd anniversary of the club proved to be one of the most enjoyable ladies' night functions in the history of the organization. President M. G. Gourlay presided and the program was in charge of Thomas Floyd and Thomas Brown.

Many a man talks about the brotherhood of man who has never been much of a brother to his own kid brother.

CARBON

Fred Liddle who has spent the past two months in eastern Canada returned to Carbon on Monday.

The Executive of the Carbon Community Club wish to thank the ladies who prepared and served the lunch for the Drumheller Male Voice Choir on Sunday. Also the people who so generously donated to the meal.

Mrs. J. F. Ohlhauser was a Calgary visitor this week.

Mr. and Mrs. Rowe arrived from Calgary this week to take over the Ritchie Hardware and egg grading station. Eggs will now be graded from 8 a.m. to 8 p.m. Immediate cash. The hardware store will be open in a week or ten days. Watch for opening announcement.

Agent for Independent Monument Works, A. V. Wallace.

Mrs. Johnson of Winnipeg is a visitor at the Halstead home.

Wednesday next is park clean up day. Let's all turn out and lend a hand.

About 20 ball players, junior and senior, turned out to practice on Sunday. There is some good material in Carbon this year and there should be a good team. Support your club.

More Locals on Page Four.

CLEANUP DAY CARBON PARK WED., MAY 8

Let's Have a Real Turnout!
THE PARK DESERVES CREDIT.

NOTICE

Central Egg Grading Station formerly operated by Mrs. Ritchie will now be open daily (except Sunday) from

8:00 a.m. to 8:00 p.m.

- IMMEDIATE GRADING.
- IMMEDIATE CASH.

YOUR BUSINESS APPRECIATED.

CARBON, ALBERTA.

A Call to Action

addressed to All Members of the Church of England in Canada by
THE MOST REVEREND DERWYN T. OWEN, D.D., D.C.L.

Primate of all Canada

NEVER has humanity been in greater need of the Christian Gospel, the inspiration and guidance of Christian teaching and the Christian spirit.

To-day we give thanks for a physical victory over forces opposed to every Christian principle. But these forces must still be fought in human minds and hearts. The only new order worth building is a Christian order. At home and abroad, the Christian Church faces a renewed challenge.

That is why the Church of England in Canada is making an appeal to her people for rededication, self-sacrifice and constructive action.

This movement seeks to make Anglicans more truly Christian; to make them conscious of the historic mission of their church; to strengthen the spiritual, educational and social work of the Church at home and abroad; and to provide funds for additional clergy, for the pension fund, for helping the Mother Church in England and the Churches in Europe in their work of rehabilitation, for providing youth training and leadership, and for assisting all Dioceses in meeting their local needs.

The Appeal was launched in our Churches on the Feast of the Epiphany, Sunday, January 6th, and will continue till May 19th. In its spiritual aspects it has already reached the homes of our people and its programme will continue over years to come.

During the week of May 12th to 19th, every member of the Church of England in Canada, so far as possible, will be visited by a fellow member, authorized to receive contributions to the \$4,300,000 fund needed to carry out the financial program.

I bespeak from every one of our members and friends the earnest, prayerful consideration of this urgent need. I am confident that if every individual does his and her part, the combined objective of spiritual enrichment and financial support will be fully achieved.

Derwyn T. Owen

An Empire Scientific Conference

MANY LESSONS in international co-operation were learned during the war, and some have proved so valuable that they will continue to be applied to advantage in time of peace. It has recently been announced that an Empire Scientific Conference, to be opened by His Majesty the King, will be held in London, Cambridge, and Oxford in June and July of this year. This conference is the result of close co-operation in scientific work which developed during the war. At that time the British Commonwealth Scientific Office was set up for the purpose of co-ordinating research in various parts of the Empire and for providing a central bureau for the interchange of opinion with the United States on matters related to scientific warfare.

Many Urgent Problems Now

It is now believed that the scientific problems of peace are no less urgent than those of war and that it would be advantageous to continue to co-ordinate the work of scientists in all parts of the Empire. The London Times commenting on the forthcoming conference says "Within the Empire, the scientific problems of peace, both technical and academic, are no less pressing than those of war. There are, for instance, urgent questions of medicine, especially tropical medicine, agriculture, nutritional science and the world fishing industry, while in the more academic field radio communications and cosmic rays present problems which can only be solved by joint efforts in all parts of the globe." It is expected it will be proposed at the conference that the British Commonwealth Scientific Office be succeeded by a similar organization to carry on this important work.

May Be Benefit To Agriculture

Imperial scientific collaboration has been carried on in the past, on a scale less far reaching than that which developed during the war. One of the most successful examples of the centralization of work for the benefit of the whole Empire has been in respect to agriculture. In 1929 the Council of Imperial Agricultural Bureaux was formed to act as a clearing house for information concerning soil, animal health, forestry and other subjects related to agriculture. It is probable that agriculture will profit to a large extent from the post-war activity of Empire scientists. There is much interest at present in increasing world food supplies, in finding new uses for surplus farm products and in many other problems which would no doubt benefit from a co-operative effort at their solution such as was applied to scientific problems during the war.

FLAVOR

THE SECRET OF TASTY MEALS

Flavor makes all the difference between "just food," and a tempting, appetizing meal. Make a practice of adding the appropriate flavor to your cooking and see how quickly "their" appetites will respond.

JUST RUB IN

MINARD'S "KING OF PAIN" LINIMENT

35¢

Do You, Too, Suffer MONTHLY FEMALE PAIN

Then try this effective medicine!

Lydia E. Pinkham's Vegetable Compound DOES MORE than relieve monthly pain when due to functional periodic disturbances. It also relieves accompanying weak, tired, nervous, jittery feelings—of such nature. Pinkham's Compound is one of the best known and most effective medicines of its kind!

THE SOLDIER'S PAL—

MECCA OINTMENT

Should be in every kit—relieves sore feet, etc.

Have No Country

Many Germans Living In Eire Are Seeking Citizenship

There is a noticeable tendency in Eire these days towards naturalization into Irish citizenship.

This is the case particularly with Germans who have lived there for years. Many of them were in the hotel business, and in normal times they would not have needed to take Irish citizenship. Now, since they have virtually no country of their own and have no desire to continue as aliens, they are seeking to become citizens of Eire.

Long-time residents who have been usually well-conducted are given the necessary certificates. Their names read strangely in a country where the Murphys, the Kellys and the Burkes predominate. — Vancouver Province.

BELOW REQUIREMENTS

In a recent discussion, it was pointed out that 2½ acres of arable land are required today to feed a human being adequately. Total area of land at present under cultivation is said to be four billion acres. As the population of the world is slightly over two billion, this only allows (theoretically) two acres per person. But India averages only one-tenth acres per capita compared with eight acres of improved farm land per capita in Canada.

Price Control And Rationing Information

Q.—How many cans of fruit can I purchase with one sugar-preserves coupon?

A.—One sugar-preserves coupon is good for two 20 fluid ounce tins of fruit. If you wish to buy only one can at a time, the grocer may make up the difference with one jar of jam or the proper quantity of any other rationed preserves, such as honey, molasses or maple syrup.

Q.—We are planning on holding a sports day on the 24th of May. Will we be allowed to sell hot dogs and hamburgers on that day?

A.—As this sports day falls on a Friday, you will not be able to sell meat of any kind.

Q.—How many sugar-preserves coupons become valid in April?

A.—Three sugar-preserves coupons can be used in April, S5 became valid on April 4 and S6 and S7 become valid April 18.

Q.—Has the price of butter been increased?

A.—On April 1st the price of creamery butter was increased four cents a pound. Prices for dairy butter remain at the same level as before.

SMILE AWHILE

Young Woman (in photo studio): "I'd like this enlarged."
Clerk: "Would you like it mounted?"

Young Woman: "Oh, yes—he'll look nice on a horse."

Mrs. Snaggs: "Did I understand you to say Mrs. Perkins is interested in business?"

Mrs. Bitters: "Yes."
"What business is she interested in?"
"Everybody's!"

Wife (sorrowfully): "I've just received a letter from poor dear mama. She says she is feeling very seedy."

Husband (with a grunt): "I suppose that means she's going to plant herself on us."

Roy: "I can't figure out why you always yell 'stop' when I try to kiss you."

Patsy: "And I can't figure out why you always stop."

Mistress: "Maggie, I think I'll take one of the children to church this morning."

Maggie: "Yes, ma'am."

Mistress: "Er—which one do you think would go best with this dress?"

Sergeant—"I suppose you wish I were dead so you could spit on my grave?"

Private—"No, sir! Not me—I hate to stand in line."

SAVES WORK
USE IT IN YOUR DAILY DUSTING

DON'T just complain of itching, burning PILES!

do something about it!

If you are troubled with itching piles or rectal soreness, do not delay treatment and run the risk of letting this condition become chronic. Any rectal itching or soreness or painful passage of stool is nature's warning and proper treatment should be secured at once.

For this purpose get a package of Hem-Roid from any druggist and use as directed. This formula which is used internally is a small, easy to take tablet, will quickly relieve the itching and soreness and aid in healing the sore tender spots. Hem-Roid is pleasant to use, is highly recommended and it seems the height of folly for any one to risk a painful and chronic pile condition when so fine a remedy may be had at such a small cost. Money back if you are not entirely pleased.

NOTE—The sponsor of this notice is an old, reliable firm doing business in Canada for over 20 years. Hem-Roid must help your annoying and painful pile condition—must do it quickly, easily and pleasantly or your own test of this remarkably successful formula costs you nothing. Try it today.

DREAM of an Alligator--

"Be Cautious in All Dealings"

THAT'S what the dream books say! And good advice it is, too—if, as is likely, your bad dreams are caused by over-stimulated nerves. And it could be that the cause of your nervousness and excitability is the caffeine in the tea or coffee you drink.

Try Postum! Postum is a delicious, heart-warming, mealtime drink that you make right in the cup, just by adding boiling water or hot milk. And Postum is free of caffeine or any other drug that might affect heart or nerves or digestion. Costs less than 1¢ a serving. Your whole family should be enjoying Postum regularly!

Postum

A Product of General Foods

"But Murgatroyd—you don't have to wait until morning before you eat your crisp delicious Grape-Nuts Flakes."

"I don't? Then pull up a cake of ice and we'll sit down to a couple of bowls of these malty-rich, honey-golden Post's Grape-Nuts Flakes!"

"Son, you'll be able to wrestle a walrus on all that grand nourishment in Grape-Nuts Flakes: carbohydrates for energy; proteins for muscle; phosphorus for teeth and bones; iron for the blood; and other food essentials."

"Two grains—wheat and malted barley—are the double-barreled reason for that Grape-Nuts Flakes goodness. They're specially blended, baked and toasted for golden-brown, delicious crispness and easy digestion."

"I'm going to fill up the sled with some giant economy packages of Grape-Nuts Flakes next time we're down at the trading post!"

Something Needed

To Convince Men They Are Needed On The Farms

Just now there seems to be a question of who will replace the aged farmers. With so many young people from the farms flocking to the cities and towns during the war years, the farm population has dwindled and many of those who have had a taste of city life are reluctant to return to the land.

It looks as though something must be done to draw back to the land competent and practical individuals who can make a go of farming. For the present the old people will have to carry on and do the best they can under the circumstances, but there is hope that eventually more war veterans will take up farming, after they have taken courses and gained some experience in agricultural practice.—Saint John Telegraph-Journal.

FOR POLISH NAVY

An unspecified number of "modern, splendidly-equipped" warships have been delivered by Russia to the Polish navy at Gdynia, under an agreement signed at Moscow, it was officially announced by the Polish government.

How to Combat RHEUMATIC PAIN

Rheumatic pains may often be caused by excess uric acid, a blood impurity that should be extracted by the kidneys. If kidneys fail, and excess uric acid remains, it may cause severe discomfort and pain. Treat rheumatic pains by keeping your kidneys in good condition. Get and use Dodd's Kidney Pills. Dodd's help your kidneys get rid of trouble-making poisons and excess acids—help you feel better. See what Dodd's can do for you. 137

MAKE LIFE WORTH LIVING! WHY SUFFER?

Do what countless numbers of happy users are doing for the effective relief of: Chronic Catarrhal conditions (as in Bronchitis, Asthma and Sinus Pains), Skin disorders such as Boils and Pimples! Arthritic and Rheumatic Pains! Ask your druggist for Odorless and Tasteless ADAM'S GARLIC PEARLES, or write Richmond Adam Co., P.O. 274, Vancouver, Can. \$3 per 100 Pearles, enough for five weeks.

PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE RAMSAY COMPANY, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

Curtain Has Been Lifted On Background Story Of Sugar Supply In Canada

WHILE German submarines were plying the Atlantic the background story of Canada's sugar supply and the work of the Sugar Administration of the Prices Board ranked high on the list of official secrets. But during the last session of Parliament, with sugar movements no longer guarded, the curtain was lifted on the various aspects of the sugar picture—importations, domestic sugar beet production and an accounting of the Sugar Stabilization Fund.

It was revealed that the Sugar Stabilization Fund had by last autumn accumulated a profit of over \$13 million on its transactions. This money is being used to keep the price of sugar in Canada down to its present level despite the rising cost of raw sugar.

During the war years one blow after another battered the sugar supplies of the allied world. The sugar industry was destroyed in the Philippines and in Java. In Europe, the ravages of war laid low sugar industries both on the field of battle and in occupied territories. Other countries, such as Australia, Fiji, Trinidad and Antigua suffered a decline in sugar production due to shortages of labor, shipping facilities and fertilizer. World production of sugar plummeted down eight million tons—in 1939 it was 32 million tons, last year only 23 million tons.

In the face of this sugar crisis, the United Kingdom, the United States and Canada, through the Combined Food Board, agreed to a share-and-share alike sugar policy. This allocation of sugar, arranged by the three countries, has been one of the highlights in recent international co-operation, giving sugar to all who need it on a fair basis.

Canadian beet sugar production has climbed to a figure 20 million pounds above the pre-war average. In 1945 our best sugar crop was 165 million pounds. During the time beet sugar production was rising in Canada it was in the process of falling in the United Kingdom and the United States. All the sugar we produce goes into the world pool and is divided equally. That means we cannot get more sugar than our allocation by simply turning out more beet sugar, though naturally any increase we achieve is of benefit to all.

In 1945 we had available for use 939 million pounds of refined sugar, as against 985 million pounds in 1944. Each year the demand for sugar, with increases in population, is going up. In 1940, before the period of sugar devastation got under way, we had 1217 million pounds of sugar for consumption, although the 1935-1939 average was 996 million pounds.

During 1945 the overall sugar target for individual usage in the three countries was set at 70.8 pounds. But each nation is free to distribute that amount as it sees fit amongst consumers, restaurants, industries and institutions. Therefore there may be, and often are, differences in the amounts granted to different types of users in different countries.

No sugar goes to breweries or distilleries in Canada, although a small amount is allocated to manufacturers of grape wine.

Stories of sugar surpluses circulate from time to time. These stories should be weighed in the light of circumstances. Very often a year's production of sugar may be turned out in a relatively short time and is naturally held on hand until normal distribution is complete. In the British West Indies, the annual production is accomplished in five months. The entire beet sugar crop in Canada is made in the last three months of the year. Furthermore, as much sugar as possible is brought into Canada before water transportation closes, because of the low haulage cost, and this sugar must be stored for monthly consumption.

The claim has been made that there is plenty of sugar in Java. The quantity is uncertain and much of it has deteriorated during the years it has been stored.

It has been suggested Canada should buy sugar from Peru. Should we do so, we would not be allowed any more sugar per year than our allocation permits and at present prices we would have to pay double what we are paying now.

REALLY UNBEARABLE

Drawing a deep breath, the sergeant faced the particularly awkward recruit.

"Look here!" he barked. "I don't mind when you turn to the right when I say left; I don't mind you turning up on parade with your tunic unbuttoned; I don't even mind when you drop your rifle, but—"

He glared in silence at the shivering culprit before he added:

"But, for the love of Mike, will you stop saying 'Sorry, my dear'?"

Visits Nottingham

Princess Elizabeth Was Greatly Interested In Youth Handicrafts Display

Princess Elizabeth inspected a youth handicrafts display at Nottingham, England, and showed great interest in the smocking and stitching of a full-sized bridal gown, done by the needlework section.

The heiress presumptive to the throne studied the timbering of a model house and asked how tiles and slates were fixed.

"What a good idea," she said, when shown samples of chairs made from barrels.

A crowd of 10,000 welcomed Her Royal Highness in Nottingham's market square.

GEMS OF THOUGHT

PRaise OF MEN

Praise like gold and diamonds owes its value only to its scarcity.—Samuel Johnson.

Real joy comes not from ease or riches or from the praise of men, but from doing something worth while.—Sir Wilfred Grenfell.

Some natures are too good to be spoiled by praise, and wherever the vein of thought reaches down into the profound, there is no danger from vanity.—Emerson

Few persons have sufficient wisdom to prefer censure, which is useful, to praise which deceives them.

—Rochefoucauld

We should examine ourselves and learn what is the affection and purpose of the heart, for in this way only can we learn what we honestly are.—Mary Baker Eddy.

Praise too dearly lov'd, or warmly sought,

Enfeebles all internal strength of thought.—Goldsmith

WORLD CHESS KING DIES—Dr. Alexander Alekhine, 53, Moscow-born world chess champion, died in Lisbon of a heart ailment. He began competing in international matches when he was 16 and first won the world title in 1927.

Postage Stamps

Free India Stamps Were Printed By The Japanese

London philatelists believe they have solved the riddle of who issued a series of nine "Free India" postage stamps.

British troops found the stamps in a building near the banks of the Irrawaddy. They were all delicately colored, produced by a photogravure process, and included the words Azad Hind (Free India).

The stamps varied in value from half an anna to 12 annas and six of them carried a surtax. Seven of the stamps depicted Indian scenes while the other two showed a map of India with a broken chain across it.

There was no evidence that any were ever sold to the public.

Philatelists decided the stamps were issued by Subhas Chandra Bose, Indian left-wing politician and leader until his death in a plane crash of the so-called Indian National Army. The stamps were printed in Burma under the auspices of the Japanese who planned to use them after their victory in India, but the Japanese campaign failed and the stamps were never used.

A dozen different kinds of sharks are found in Canadian waters.

Plans Are Being Made For More Adequate Protection Of British Crown Jewels

EXPERTS are studying the bomb-damaged jewel house of the 900-year-old Tower of London as the first step toward incorporating ultramodern devices to guard one of the world's greatest treasures—the British crown jewels. Until these devices are installed, including electrically controlled locks and other still secret means of protection, the jewels will remain in the vaults of the Bank of England, to which they were taken for safekeeping during the war.

Star Bright

7404

by Alice Brooks

Star medallion cloth—you'll be starry-eyed if it's yours to use when you're the hostess. A medallion, quickly memorized, fast to crochet. This star design is superbly elegant used for spreads, scarf, buffet sets as well as cloths. Pattern 7404 has directions, stitches.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

* If the fabulous array of gems and royal adornments had not been removed from the tower during the war many if not all, would have been lost or damaged because one of the last buzz bombs loosed by the Germans crashed into the jewel house.

Members of the National Jewellers association, which is advising on protection to be given the jewels, declined to estimate their value. But it is believed that the intrinsic worth of the thousands of diamonds, rubies, pearls, emeralds and other precious stones as well as golden objects would easily top \$50,000,000. Actually, of course, any one of the royal items is symbolically priceless.

The decision to enlist every possible scientific aid in rebuilding the jewel house was taken partly because a huge post-war influx of tourists has been expected and as one guard put it, "science is a two-edged sword available also to thieves."

Also in this country of tradition no one has forgotten that in 1671 someone actually did steal the crown jewels—Captain Blood, whose audacity won the admiration of King Charles II, and earned him his freedom and a lucrative job instead of the scaffold.

Such leniency is not to be expected if any one tries again, but officers charged with the safety of the jewels are not forgetting they constitute one of the most powerful lures in the world.

Among the most precious items of the crown jewels are: The imperial state crown which is set with more than 2,700 diamonds including the "Second Star of Africa," the Black Prince's ruby, a sapphire from the coronation ring of Edward the Confessor, four pearls worn by Queen Elizabeth and innumerable other precious stones. The imperial crown of India has more than 6,000 diamonds and a magnificent 34-carat emerald. The Queen's crown contains the famed Koh-I-Noor diamond. In the royal sceptre is the "Great Star of Africa," the world's largest cut diamond.

The oldest item is a golden bottle in the form of an eagle, believed to be about 1,400 years old. The King's orb is a ball of pure gold ornamented with diamonds, pearls, sapphires, rubies and emeralds and there are five jewelled swords as well as many lesser pieces.

Have Never Smiled

But War-Shocked Children In Greece Are Being Taught

In Greece, travellers come upon small groups of children under an olive tree, listening to a teacher. The teacher usually stands, with a broken tree limb in his hand, tracing on the earth.

That broken branch and the teacher's memory are all the "school equipment" those children have. Pencils cost \$2 each. There is no paper, no books. A fourth of the schools are rubbish and most of the rest damaged.

Many of the children have those queer big heads and twisted legs that come from too little to eat for too long. The teacher himself often is so malnourished that he needs help.

But the Greeks are determined the children shall re-learn the ways of peace, so they start these olive-tree schools.

This is part of the baffling job facing the United Nations Relief and Rehabilitation Administration.

U.N.R.R.A. is limited in what it can do for schools, and can spend no money on toys. Yet U.N.R.R.A.'s doctors think play now is so important to war-shocked children that they have a program in Greece called "to teach the children to smile".

Tens of thousands of children have no reflex action of the cheeks which we know as a "smile".

BRITISH INVENTION

LONDON.—One of Britain's latest inventions is a Braille reading micrometer for the rehabilitation of blinded ex-servicemen in certain industries. The instrument will enable former skilled tool and instrument makers to carry on with their normal work.

The discovery that coal could be used to produce high temperatures was first made by the Chinese in the sixth century.

MANLY F. MINER APPRECIATES TRIBUTE TO FAMED FATHER—Mr. John R. MacNicol, Conservative M.P., has introduced in the House of Commons, Ottawa, a bill known as the Jack Miner National Wild Life Bill which objective is in Canada to observe April 10th, the birthday of the late Jack Miner, Canadian Naturalist, as a day to study in the schools the value of bird life to the country. The day for Humane Societies to stress kindness to children, birds and animals, a day to remind the public to clean out their bird houses and a day for civic organizations to sponsor bird house building contests in the schools. April 10th is not only the birthday of the late Naturalist, but is also such an appropriate time of the year when the birds are returning to Canada to nest. Such a day in Canada would be a living and fitting monument to Jack Miner. In the U.S.A. a whole week is observed as National Wild Life Week. Why should not Canada have one day? The Bill was seconded by Mr. J. A. Bradette, M.P., Liberal from Cochrane. Photo shows Manly F. Miner standing by the Miner mail box as he reads the announcement in a local newspaper. Manly F. Miner is 48 years of age and ever since he was 13, some 35 years, he acted as public relations and personal secretary for his late father, Jack Miner.

Reo Trucks in Production Soon

First post war production of trucks in Canada will get under way this month, at a new manufacturing plant near Toronto announced today by H. E. Hund, president of Reo Motors.

Announcement of Reo's purchase of the new manufacturing and assembly plant, which means substantial addition to Canada's industrial payrolls and increased need for Canadian fabricated parts, also stated that conversion of the plant to the manufacture of trucks is nearly complete and that production is beginning to roll.

For this purpose, Reo is converting one entire unit of the Canadian government's wartime radar plant, located in the industrial centre of Leaside, Ont. a mile and a half from Toronto.

This provides suitable facilities for combined truck and bus production with a total capacity ample to meet Canada's growing industrial and transportation needs. Expected output, qualified observers say, exceeds many times Reo's prewar Canada total and suggests greatly increased exports throughout the British Empire.

The new plant is a modern, one storey daylight factory with 59,000 square feet of floor space, easily accessible for workers and equipped with railroad sidings for incoming raw materials and outgoing finished vehicles. It will operate under the direction of Robert J. Telford.

"Acquisition of the new factory at Leaside", Telford said, "indicates Reo's faith in the industrial future of Canada, both as an expanding market for commercial vehicles and as a source of such equipment for the British Empire."

"All manufacturing work previously performed at the Toronto branch now will be centralized at the Leaside factory. The branch also will continue in full swing as an improved parts depot and service operation capable of handling any kind of special work on trucks including major modification of chassis and bodies of any type."

"The Toronto branch will continue to be the nerve centre and hub of parts and service distribution to the entire Canadian network of more than 100 Reo dealers throughout the provinces."

Mr. D. G. Murray is the Reo dealer in Carbon.

STREET LIGHTS MAY BE INSTALLED

Negotiations have been completed for the installation of street lights in the various hamlets of L.I.D. 442, according to an announcement by Gordon E. Taylor, MLA.

All that is needed now, Mr. Taylor stated, was for the people concerned to give the green light. Five lights will be placed throughout the hamlets on the main thoroughfares by the Canadian Utilities, with the cost being borne by the present users of electricity in the districts concerned.

Arrangements are being made for a public meeting to give opposers an opportunity to raise objections to the scheme. If no serious objections are raised the public utility commission will issue an order permitting the Canadian Utilities to proceed.

Mr. Taylor is confident of co-operation on this issue since he has pressed the issue for some years.

No deadlock can be fully broken till somebody takes full blame.

For a brave new world we need a lot of brave new individuals.

WATCH DATES IN BARLEY CONTEST

Competitors in the 1946 National Barley Contest are asked to watch four important dates which are stressed in a booklet prepared by the Contest Committee giving details.

The first date is June 15, the date when entries close. Entry forms may be obtained from the nearest elevator operator, agricultural representative, or by writing direct to the provincial contest committee.

As soon as entries are received by the provincial committee the applicant will be registered as a contestant in the National Barley Contest. The other dates to be watched are:

June 29. Applications for field judging close. Each contestant shortly after he files his entry will receive an application for field judging which must be completed and mailed on or before June 29. Mail it to the chairman of the provincial committee.

Nov. 15. Applications close for sampling barley held for seed on farms. Again, mail applications on or before this date to the chairman of the National committee.

Nov. 30. Last day on which contestants may ship their carload of competing barley. As in the other case, mail applications for grain judging to the chairman of the National committee.

BEEF SHORTAGES ARE DECLARED TEMPORARY

Reduction of beef supplies on the Canadian market is explained by the Prices Board to be an annual seasonal occurrence, one month early this year due to feed shortages. Officials explained that there always has been a period of short supply between the time the last grain fed cattle come to market and before the grass fed cattle are fit for market some time in June.

The Canadian meat ration has proven to be ample and distribution of supplies has been sufficiently effective to prevent any major consumer shortage, Board officials say. They predicted that seasonal shortage would reduce overall consumption but that a general increase in price ceilings would tend to encourage the marketing of unfinished cattle at this time.

Deprecating statements alleging the existence of widespread black markets Board officials said this aggravated the situation. It was noted that cattle prices are adjusting themselves to established beef ceiling prices and that the average cattle prices have already increased by forty percent since 1941.

OFF THE RECORD

OTTAWA—Since complaints heard in Ottawa now against the continued heavy expenditures of the government in peacetime the question is asked if the government is 'trying to liquidate its debts by spending money like water?'

It is suggested in Ottawa that some of the addresses in Parliament during this session should be broadcast over the air and this seems to be another of those sound propositions in this nation's capital!

It's when we're unwilling to change ourselves that we think the other fellow is unchangeable.

ROCKYFORD

R. Nicholson left Tuesday for Turner Valley where he will work in the Royal Lumber yard. Robt. has been in the yard here during the illness of Mr. Durant.

Mr. Rae was in town recently doing permanents. That's what we call headwork.

Mr. Bradwell, a former teacher, was in town last week.

York's Cafe has been redecorated inside and a paint job done on the roof. Just a cover job.

Don't be like the absent minded cowboy who was wandering about with a rope in his hand and did not know if he had found the rope or lost the horse. Send in your news items.

Mr. and Mrs. R. Stone were Calgary visitors Monday.

Mrs. M. Nolan who has been cooking on the road gang received a wire informing her that her son was seriously hurt in an accident and was in the hospital at Edmonton. She made a hurried trip to the north city.

E. Halpin was a Rockyford visitor last week.

Babe Fuller and family were on the missing list last weekend. Wonder where?

A gang of men are repairing the UGG elevator.

LITTLE ITEMS OF LOCAL INTEREST

There will be a service in Christ Church on Sunday, May 5th at 3 p.m., Canon T. B. Winter in charge.

A few of the local lads have been helping the government finance these days. Twenty and costs.

Mr. and Mrs. S. Goldenbert and son and Mrs. S. Ostrovsky of Calgary were Sunday visitors at the M. Switzer home.

Don't forget the show in the Scout hall tonight.

Tom White has a pile of lumber in town getting ready to build a house.

Mr. and Mrs. D. Rusler arrived in Carbon last week from Drumheller. Mr. Rusler is the new manager at the Bank of Montreal.

"Kitty" will be at the Acme Theatre this Friday and Saturday.

Bob Shaw's condition is much improved and we expect him home from the hospital soon.

Have you paid your subscription? If not we would appreciate a remittance at your earliest convenience.

Mr. and Mrs. D. R. Mackay left on Sunday for Tofield. Mr. Mackay has been transferred by the bank to that point.

It pays to read the ads and it pays to ADVERTISE!

HEALTHY AND VIGOROUS CHICKS THE SHUR-GAIN WAY

SHUR-GAIN 18% CHICK STARTER... IS THE FEED THAT GETS BEST RESULTS!

"ONCE TRIED, NEVER WITHOUT" That is what thousands of poultry men are saying, this Spring. You'll agree... after you have tried SHUR-GAIN 18% CHICK STARTER!

After many years of research, CANADA PACKERS, Canada's largest feed manufacturers, is now providing the poultry man with the feed that has more than proved itself. Full of vitamins, minerals and high quality proteins, SHUR-GAIN CHICK STARTER promotes rapid growth, fast feathering, fine bloom and leg color! IT'S PROVED and TESTED.

JOHN COULTER, librettist, and HEALEY WILLAN, composer, confer over the score of their opera "Deirdre of the Sorrows," which was heard over the CBC on Saturday, April 2nd. The opera retells an ancient Celtic story.

THE WORLD OF WHEAT

Mr. Hoover, former president of the United States, and now in charge of all relief food for Europe and Asia, has just issued his first report from the spot in Europe. It is a sad document. 150,000,000 European people alone, Mr. Hoover tells us, have insufficient food to support life, even on a minimum standard. Millions of old people and little children will die before the new crop is harvested unless much more food can arrive in the next two months. Many are doomed to die in spite of anything that can be done.

Mr. Hoover pleads for all people to save bread and food on their tables and for farmers everywhere to ship every single bushel of wheat, oats and barley to the market that they can possibly spare from their farms. Even a single wagonload of grain will save lives that otherwise would be lost. Mr. Hoover urges all of us to grow large vegetable gardens so as to cut down our own consumption of bread and meats, all so that more food may be available to the starving people of Europe.

All this concerns Europe alone, but the plight of untold millions in Asia is even worse. So let us all try to do our full share, however small it may be, for even a little extra food may save a valuable life.

A.F.U. Notes

Don't forget the regular meeting of the Alberta Farmers' Union on Monday, May 6th, 8 p.m. in the Scout Hall.

Please attend these meetings if you are dissatisfied with the raise in gasoline, the raise in the price of machinery, the present form of income tax and the numerous other items going up in price.

It is time the farmers put on a united front and demanded their rights. Agricultural products are at a low level now compared with other commodities we have to buy.

At this meeting a farm boy or girl will be nominated to attend Farm Young Peoples' Week at the university in Edmonton.

The Alberta Wheat Pool will pay the fare both ways and \$10 of the \$14 charged for board while attending for the week.

The course starts June 6th. All young people please attend this meeting.

Anyone wanting a dam or dugout will do well to attend the meeting as we have been in touch with contractors who will come to our district and build a dugout for \$275, \$125 being paid by the P.F.A.A. The dugout can be finished in one day.

All farmers are asked to have a dugout on their farm if at all possible. It will help the moisture situation and will bring more birds to the country to destroy pests. The Carbon Fish and Game Association will be asked to help persuade farmers to have a dugout or dam constructed on their farms.

So let's turn out to this meeting and help ourselves. Don't let "George" do it all.

TOO MANY LOST RATION BOOKS

About 50 ration books are lost in stores every week and returned by the stores to ration offices, officials of the ration administration state in advising ration books holder, to look after their property.

Already there are 200 unclaimed ration books in the Edmonton office, some with addresses from as far off as Victoria.

Lost ration books should be claimed from ration offices or local offices in the centre in which the book disappeared. They are not returned by mail because in some instances the ration book holder may have made application for a new book.

1946 is an all-important year FOR CANADA'S TOURIST BUSINESS

MILLIONS OF AMERICAN VISITORS are expected to come to Canada during 1946 for their post-war vacation.

It won't always be easy to accommodate them. We still have our crowding and shortages. We are still in the aftermath of war. This is the very reason we should all take special care to be courteous and considerate to our guests this summer.

This year, of all years, we must maintain the reputation we have won for true hospitality.

YOU MAY NEVER SEE A TOURIST, BUT...

tourist dollars flow to you. The grocer, the garage man, the farmer, the office worker—everybody benefits directly or indirectly from tourist spending, and the extra work and income it creates. Last year, tourists in Canada spent more than one hundred and fifty million dollars. In the years ahead, as our ability to handle tourist traffic grows, who is to say how big this business may become? For Canada is in an enviable position—a natural vacation land next door to the most travel-minded nation in the world. This is an all-important year! It may be difficult in many ways yet it holds great promise for the future.

THEY'LL BE TALKING ABOUT US... We want them to come again. We want them to tell their friends: "We had a marvellous time in Canada!" By making them truly welcome, we can win millions of enthusiastic salesmen for Canada—"satisfied customers" who will pass on to many times their number the story of Canadian hospitality and of Canada's unlimited attractions as a vacation land.

The Tourist Business is Your Business!

CANADIAN GOVERNMENT TRAVEL BUREAU

Department of Trade & Commerce, Ottawa

FLAX BRINGS \$18,000,000 TO WESTERN FARMERS

The Western Canada flax crop returned a gross revenue of \$18,000,000 last year, according to a recent survey. The figure is impressive in showing not only what was done but what could be done with this crop on the prairies. With the price raised 50c a bushel, now making a total of \$3.25 a bushel, the amount will undoubtedly be higher for 1946.

There can be no doubt that much more flax could be grown in Western Canada at a substantial profit to farmers, in fact a number of steady flax growers have been saying recently that they have found flax their best paying crop. Unfortunately, from the point of view of those interested in increased flax production, an "anti-flax" feeling has grown up among farmers in some sections, a feeling apparently arising out of unsatisfactory experience in the past.

That feeling, plus a heavy demand for flax products, make a booklet just issued most timely. Entitled "The Truth About Flax" the booklet contains a down to earth discussion about flax, its advantages and how to exploit them, its disadvantages and how to overcome them.

The committee has taken all the commonly heard arguments against flax growing and has answered each one of them in airy generalities but a

sound common sense fashion which presents flax growing in a new light. In addition, the committee has marshalled all the arguments in favor of flax production and the list is long and powerful.

But the booklet goes much farther than that. It gives sound advice, based on official reports about choosing a field for flax, crop rotation, preparation of the seeded bed, choice of variety, planting time, weed control, disease and insect control, harvesting and marketing. The material the committee has produced to support its arguments cannot help but be of interest to all farmers.

Quite aside from its main argument, that flax, when properly handled, can be the best paying of all prairie crops, the committee has called attention to the wide variety of things bought by farmers which depend upon flax production for some of their basic materials. This is something few of us have stopped to consider; and the extensiveness of the list proves that there can be no doubt that the farmer who raises flax will not be left with his crop unsold.

We find that every day the farmer uses a flax product, in the form of linseed oil, paint, linseed oil meal, cigarette paper, currency paper and documentary paper, linoleum for his floors and oilcloth for his tables. We find too that flax products go into the making of castings used on farm machinery,

into the production of rubber for tires, and into the making of printer's ink used in the farmer's newspaper and in government bulletins and other literature.

All in all, flax seems to be a mighty interesting and profitable crop.

One of the busiest conductors and violinists in Toronto is **ALBERT STEINBERG**, who since Christmas has been directing an Ontario school series, and is concertmaster on *Let There Be Music*, heard usually on Wednesdays on the CBC, and as a member of the string section with *Voice of Victor and Singing Stars of Tomorrow*.

CONSUMER CREDIT ORDER ALTERED

Alterations in consumer credit regulations are announced by the prices board. Among the changes is extension of payment of charge accounts from the 25th day of the month following that in which goods were purchased to the 10th day in the second month following that in which the purchase was made. In default in payment by this time goods exceeding a total cash price of \$10 may not be delivered to the defaulting buyer.

Provisions in previous orders specifying minimum down payments have been withdrawn. Instead it is provided that the cash price of any goods must be quoted to a prospective buyer and the price tag, card or label attached to or displayed with any such goods must show the cash price. Maximum prices fixed by or under authority of the Board will be cash prices only, unless otherwise stated.

More flax is needed in North America than is grown, and in addition there is a demand for flax seed from Europe. Flax growers are assured of a saleable crop for years to come. Flax products go into feed, paints, printer's ink, linoleum, oilcloth, paper and short

WORLD HAPPENINGS
BRIEFLY TOLD

Reports compiled in Rome state that 22,000,000 persons died during the war, Vatican radio said.

Application has been made for construction of a \$625,000 (\$2,812,500) penicillin factory in Glasgow.

The Pibaireachd society of Scotland helped train 93 Canadian army pipers during the war, in courses given at Edinburgh Castle.

About 1,400 horses of a possible total of 20,000 expected to be shipped to France during 1946 have left Canada since the start of the year.

Five Welsh ports—Cardiff, Newport, Swansea, Port Talbot and Barry—are seeking the export trade formerly handled by Hamburg, Germany.

German prisoners-of-war will be used as porters, cleaners and other non-technical jobs on British railways to relieve the manpower shortage.

Britain has 2,133,000 telephones in use, with annual call totalling 1,430,000,000. Both telephones and radios are controlled by the postal department in that country.

A dainty duet this frock and party set. Pattern 4612 buttons down front for easy wearing and ironing. Two versions: for playtime; for dress-up. Panties may match.

Pattern 4612 comes in sizes 2, 4, 6, 8. Size 6, puff sleeved frock, takes 1 1/2 yards 35-inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

Powerful Rocket

Deadliest Thing Ever Fired From Airplane Says U.S. Colonel

The United States war department removed the veil of secrecy around "Tiny Tim", a powerful rocket which an army spokesman said is "by far the deadliest thing ever fired from an airplane."

Col. Donald B. Diehl, commanding officer at the Dover army air field, said the rocket "can sink almost anything that floats." "It has driven holes all the way through a light cruiser from side to side," he reported. "It goes through a destroyer as if it were a piece of paper."

The new weapon, which can be fired from any present type fighter plane or medium bomber, was described by Col. Diehl as a "huge rocket 11.75 inches in diameter and 12 feet long."

Paris was the largest city in the world for 1,000 years. 2668

SAVES REGINA SCOTS' FACE

Dancing teacher Marilyn Whittet is the answer to Scotsmen's prayers of Regina, Sask. All set to celebrate Robbie Burns day last January, Regina Scots couldn't find anyone qualified to dance the Highland Fling. An "importation" filled the bill temporarily, but Marilyn, a Regina citizen, now is taking lessons in highland dancing. And she'll teach others.

VALUABLE CHEQUE

A cheque for £24 (\$108) made out by Charles Dickens, the novelist, in 1868, in payment of a domestic account was auctioned at Seymour Hall, London, in aid of the Marylebone Services' fund for needy ex-servicemen. Also auctioned were grandfather clocks, antiques, a Persian rug and wines and spirits donated by Marylebone residents.

For Bee Keepers

Should Feed The Package Bees At Once On Arrival

Importers of package bees should be sure to have all the necessary equipment ready to house and feed the bees when they arrive from the Southern States because the shipper supplies only enough food for the bees to carry them to their destination, says C. A. Jamieson, Bee Division, Central Experimental Farm, Ottawa. The cages on their arrival should be set in a cool, shady place and thin honey or sugar syrup brushed or sprayed on the screening. The bees will soon become quiet and may be transferred to their hives immediately if the weather is dull; or, if warm and bright, postpone the transfer until late afternoon or evening, thus reducing the danger from drifting.

The new colonies should be fed liberally until they are well established and are able to secure enough for their needs from the spring flowers. Where all foundation is used, more food will be required as the bees need sugar for the manufacture of wax.

Established beekeepers will have spare combs containing pollen and these should be used in the package colonies. If any colonies are found to be queenless, unite them without delay to a queenright colony.

A beekeeper entitled to obtain sugar should write to the Provincial Apiarist of his province to secure the special permit well in advance of the time the packages are due to arrive.

A Double Record

Liner Queen Elizabeth Docked For Second Time In Dark

The Queen Elizabeth completed a double record recently when, for the first time in her six years' career, she docked at Southampton in the dark—a tricky job for so huge a ship. The first "leg" of the record was put up by her master, Captain C. M. Ford, when at the start of the voyage he brought the liner out from New York without assistance because of the tugboat strike in the port. On arrival at Southampton, Captain Ford said the liner behaved perfectly on both occasions.

Answer To Last Week's Puzzle

PEG BELLE TAKES CROWN.—Pretty young winner of the title "Miss Winnipeg of 1946", is Joan Stirling, happily wearing her crown of office.

FROZEN APPLE JUICE

Frozen apple juice may become a commercial reality, allowing producers to extend the market period beyond the normal season. Experiments by the food technology division of the University of California have shown that both fresh apple juice and sharp cider retained their natural flavor and color after even six to 12 months in storage.

A Wise Investment

Canada Cannot Afford To Refuse Credit To Other Countries

Some find it difficult to understand how this country, laboring under the financial hangover from the war, and with a heavy tax burden, can afford to loan hundreds of millions to other countries. The answer is that it could scarcely afford to do less. Actually, the so-called loans are putting money in our pockets.

The word "loan" is something of a misnomer. We are extending credits to Britain and other European countries. With these, they must and will buy our goods. What they pay for them will make it possible for us to develop our resources of raw materials, and will pay the wages of thousands of workers. Without these credits, the money might lie idle, doing no one any good.

It is the velocity, not the weight, of money which gives it practical value. That is, perhaps, an oversimplified exposition, but it constitutes the fundamental principle, and it is a sound one.—Windsor Star.

VALUABLE IDEA

A suggestion which saves from 10 to 15 minutes in preparing a hypodermic needle for use recently brought a \$150 award from the Army to Anthony C. Chiginski, a laboratory mechanic at Fitzsimons General Hospital near Denver, Colorado.

**OUR COMPLETE
SHORT STORY—
THE MASTER
MIND**

By G. K. HEINTZMAN

Copyright
Wheeler Newspaper Syndicate

SAM SHAPIRO was down to his last two-bits.

As he walked away from the Tremont poolhall along the crowded downtown sidewalk he slipped the coin into a pocket of his checkered vest. He tilted his black homburg down over one eye and for a few moments he muttered unkind words about all pool-players and their descendants down to the third generation.

That was the situation until suddenly into Sam's fertile mind there came the sixty-four dollar question: How was he going to hoist the remaining two-bits into a decent roll? Sam didn't know exactly. Yet somehow he had always managed to stay in the dough, right from the days when he used to shoot marbles with the boys against the curbstone, until later in life when he graduated to the poolroom.

Sam attributed his success to his great ideas and to the fact that he was perhaps a little above the average man mentally. He also held the firm opinion that everything in this world was a racket and that everybody was out to beat everybody else. He used to get so many brainwaves that the boys would always say: "Sam, some day you'll be president." But Sam was not interested. And anyway he had it from the grapevine that the job was filled.

Sam pushed his black homburg up a bit and scratched his noggin. A sure sign that he was thinking. The ideas began to come, slowly, and then faster, until they were buzzing around beneath the black homburg like a bunch of black flies.

Idea number one came first. It was to drop over to Joe's Lunch Room and meditate on the ways and means of upping the two-bits. Idea number two followed quickly. It was to put whatever he ate on the cuff.

Sam smiled. He took the quarter from his pocket and began flipping it up in the air and then catching it again. Just as he passed the huge Banker's Trust Building he missed a catch and the coin fell to the ground.

Before he could recover it a strange hand darted out from one side and picked it up. Sam turned quickly and saw an old, rather pleasant-faced beggar with a tin cup, sitting on the bank steps. "You missed the cup, sir," the beggar said smilingly, "but I don't mind reaching—not for a quarter."

Sam's eyes popped. He stared at the quarter, now resting peacefully at the bottom of the beggar's tin cup. It was the only coin there. He wondered how good were the chances of getting it back.

They didn't seem so hot. He could tell that there was no use explaining—this bird wouldn't understand. And he knew that only a fool would try to snatch two-bits from a beggar's tin cup on a busy downtown street. He wished it was dark.

Sam scratched his noggin but all was quiet beneath the black homburg. The beggar's cheery voice spoke again. "You seem to be thinking, son," he said. "Will you tell me your name?"

2668

"Sam Shapiro," Sam snapped. But he didn't know why he'd bothered to answer the question except that so far he hadn't thought of an angle to get the two-bits back.

"Sam Shapiro is a nice name," the beggar smiled. There was a strange quality about this man's voice that was unlike the usual run-of-the-mill beggars. A note of happiness almost, as though he was about to render some act of service to a fellow man.

But Sam was not one to appraise matters like that. Nor was he in the mood. He even failed to notice the strange actions of the beggar who had produced a cheque book and fountain pen from an inside pocket and had started to write. When he finished he tore off a neatly written cheque made out to Sam Shapiro for one hundred dollars. He handed it to Sam. "Don't ask me the reason, son," he said in that same musical voice. "Just walk into the bank here and cash it. It's good."

Sam was puzzled. He took a little squint at the cheque and he almost said "crackpot" out loud. But then suddenly his eye rivetted on the signature. That did it. Hurriedly he said, "Thanks pal" and bounded up the bank steps.

He saw idea number three right in that signature. Everybody knew that E. Wilson Dodds was president of Banker's Trust. And already Sam could see Mr. Dodds' face when he informed him that a screwball beggar was outside handing out cheques with Mr. Dodds' signature on them.

It should be good for a five-spot at least, Sam calculated, and probably a couple of Dodds' good cigars to boot.

Inside the bank Sam hesitated for a moment. There were many doors and he didn't know which one led to Mr. Dodds' office. He stepped up to a nearby cage marked "Paying Teller" and held out the cheque significantly. "I'd like to see Mr. Dodds' about this."

"Mr. Dodds' is out," said the teller. He took the cheque from Sam's hand with a courteous smile and looked it over. "It won't be necessary to see Mr. Dodds' about this," he said after a moment. "If you can identify yourself I'll cash it for you."

Sam gasped. He couldn't figure out what kind of a game these people were playing with him. Nevertheless they weren't going to catch him napping, so he looked the teller right in the eye. "I'm not trying to cash this cheque, pal," he said. "I'm only trying to inform you that there is a screwball outside writing cheques with Mr. Dodds' signature on them."

The teller laughed out loud. "It's quite all right, sir." "That was Mr. Dodds! He's one of the best. Used to often wonder if there was still such a thing as charity in this modern world. So today he put on that disguise and decided to give one hundred dollars to the first ten people to have pity on him. . . . And let me congratulate you, sir. You are the first person to cash a cheque."

A Good Suggestion

Advertising Might Educate People In Principles Of World Co-operation

Use of newspaper and magazine advertising to educate people in the principles and concepts of world co-operation was suggested in an address in Toronto by Albert Bakovsky, Austrian-born founder of the educational research society. "If we can sell soft drinks and tobacco through the medium of advertising," he said, "it is just as plausible that we could sell education and spiritual belief through the same medium."

GREEN CROSS

50% DDT

POWDER CONCENTRATE

For BARN and LIVESTOCK SPRAY

A dual-purpose DDT Powder. Mixed with water one pound makes one gallon of Barn Spray OR five gallons of Livestock Spray in their most effective form. Convenient, economical and no fire hazard. 1/2 lb., 2 lb. cans.

HARD TO PICTURE

Secretary of State Paul Martin in a statement endorsing the two-week clothing drive of the Canadian Allied Relief Fund which starts June 17 said no words of his "could picture truly the condition of the sick and starving and ill-clothed of Europe's stricken countries."

The word "cereal" is derived from Roman ceremonies known as "the cerealia" celebrated in honor of the Goddess of Grain.

Use of the one-way disse for seeding flax has increased enormously in Western Canada. For one thing the accuracy of the new seeder attachments is considerably greater than that

of worn drills. Another factor is that the spreading or scattering of seed by the one-way allows a more complete soil coverage by the flax plants than is obtained with a drill.

TOURISTS GET RATION BOOKS

Tourists who visit Canada for seven days or longer will be able to obtain temporary ration cards on application to a local ration board or from any special office set up for distribution of these cards at border points. No temporary ration cards will be issued for a period of more than one month.

Tourists stopping at summer hotels or boarding houses will not need temporary ration cards no matter how long their visit.

Canadian ration book holders are required to surrender ration coupons at hotels or boarding houses if their stay is for two weeks or longer.

"BUY FOR LESS AT HOME"

**Farmers' Exchange
RED & WHITE STORE**SEEDTIME and HARVEST
By Dr. F. J. GREANEY,
Director,
Line Elevators Farm Service,
Winnipeg, Manitoba.**Seed Protection and Conservation**

Famine again stalks the earth. In Europe and the Far East millions of people are in peril of starvation. To ease the threat of world-wide famine Canada is trying to export as much food as possible. This spring, therefore, prairie farmers are urged to protect and conserve their seed-grain supplies.

Seed Protection. Seed treatment is seed protection. Proper treatment of cereal seed not only controls the destructive surface-borne smut diseases, but also protects the seed and young seedlings from soil-inhabiting organisms that cause seed decay, pre-emergence blight, seedling blight, and root rot.

It is our firm belief that all seed of wheat, oats and barley should be treated this spring unless the farmer is satisfied that his seed is strong, undamaged, and free from smut.

Seed Conservation. There should be no reluctance on the part of prairie farmers to do their utmost in conserving seed. Bushels of valuable grain can be saved if certain practical precautions are taken during seeding operations. A few of these are: (1) Do not use leaky sacks or grain-boxes for seed; (2) Lift the seed drill whenever it is possible to save grain; (3) Avoid sowing seed too deeply or thickly; (4) Maintain the seed drill in good working order. Watch individual grain drills for skips, misses, etc.; and (5) Treat enough seed for your 1946 planting requirements only. Seed treated with a mercury dust can not be used for commercial purposes or fed to livestock.

Every farmer should realize that the actual placing of bushels of seed in the soil is an exceedingly important farm operation. Accurate seeding means uniform stands, fewer weeds, more even ripening, and higher yields.

The world needs food. Avoid waste by protecting and conserving seed.

Flax needs good soil and available moisture for maximum growth. Commercial fertilizers benefit flax, if applied to the crop before, but manure is not recommended ordinarily because it may carry seeds and leaves the land too open if used for the flax crop. However, if manure is applied in the summer fallow year, flax will respond to it the following year.

In the world today a new train of thought is long overdue

People get the most kick out of life who do the least kicking.

Mutual mistrust and the atomic bomb can't live together.
